

SAMPLE ID CARE PLAN FOR WORSHIP SERVICES FOR RESIDENTS WITH DEMENTIA AND THEIR FAMILIES

Problem/Strength	Date/Goal	Approach	Discp	Outcomes
Strength: Resident is able to sing hymns that are familiar to him from his past during worship service and seems to enjoy attending the worship service.	Resident will continue to enjoy attending worship service by singing and responding to the music 1 x per week for the next 4 weeks	Attendance at a worship service of his choice appropriate for his needs 1 x week for the next 4 weeks.	Act. Pastoral Care Nsg.	
Strength: Resident is able to say prayers of his faith when initiated by family members or familiar persons.	Resident will continue to respond to prayers when initiated by family members and a neighbor during visits scheduled 1 x per week for the next 4 weeks.	1:1 faith sharing visits 1x wk. for next 4 wks.		
Resident has been unable to participate in formal worship services in chapel for past 3 months, as he did formerly, because now he becomes restless after 15 minutes and wants to leave.	Resident will attend the short worship service for residents with dementia with a volunteer or family member he feels comfortable with in the lounge 1 x per week for the next 4 weeks.			
There has been a decrease in the resident's verbal and social interaction with his family for the past month. Before coming to the home, the resident attended weekly worship services with his family	Resident will express himself verbally and interact with family member by responding through song and/or prayer during worship service for residents with dementia attended with a family member or volunteer 1 x per week for the next 4 weeks.
