STATE HEALTH INNOVATION PLAN

## New York State Health Innovation Plan

**Goal** Delivering the Triple Aim – Better health, better care, lower costs

<p><b>Pillars</b></p>	<p><b>1</b></p> <p><b>Improve access to care for all New Yorkers, without disparity</b></p> <p>Elimination of financial, geographic, cultural, and operational barriers to access appropriate care in a timely way</p>	<p><b>2</b></p> <p><b>Integrate care to address patient needs seamlessly</b></p> <p>Integration of primary care, behavioral health, acute and postacute care; and supportive care for those that require it</p>	<p><b>3</b></p> <p><b>Make the cost and quality of care transparent to empower decision making</b></p> <p>Information to enable consumers and providers to make better decisions at enrollment and at the point of care</p>	<p><b>4</b></p> <p><b>Pay for healthcare value, not volume</b></p> <p>Rewards for providers who achieve high standards for quality and consumer experience while controlling costs</p>	<p><b>5</b></p> <p><b>Promote population health</b></p> <p>Improved screening and prevention through closer linkages between primary care, public health, and community-based supports</p>
<p><b>Enablers</b></p>	<p><b>Workforce strategy</b> <b>A</b> Matching the capacity and skills of our healthcare workforce to the evolving needs of our communities</p> <hr/> <p><b>Health information technology</b> <b>B</b> Health data, connectivity, analytics, and reporting capabilities to support clinical integration, transparency, new payment models, and continuous innovation</p> <hr/> <p><b>Performance measurement &amp; evaluation</b> <b>C</b> Standard approach to measuring the Plan's impact on health system transformation and Triple Aim targets, including self-evaluation and independent evaluation</p>

# SHIP OBJECTIVES AND GOALS

## Three Core Objectives within 5 Years:

- 1.80% of the state's population will receive primary care within an APC setting, with a systematic focus on population health and integrated behavioral health care;
- 2.80% of the care will be paid for under a value-based financial arrangement; and,
3. Consumers will be more engaged in, and able to make more informed choices about their own care, supported by increased cost and quality transparency.

## We aspire to:

1. Achieve or maintain top-quartile performance among states for adoption of best practices and outcomes in disease prevention and health improvement within five years;
2. Achieve high standards for quality and consumer experience;
3. Generate savings by reducing unnecessary care, shifting care to appropriate settings, reducing avoidable hospital admissions and readmissions and curbing increases in unit prices for health care products and services that are not tied to quality, within five years.

# What is SIM?

STATE INNOVATION MODELS TESTING  
GRANT

# SIM GRANT APPLICATION

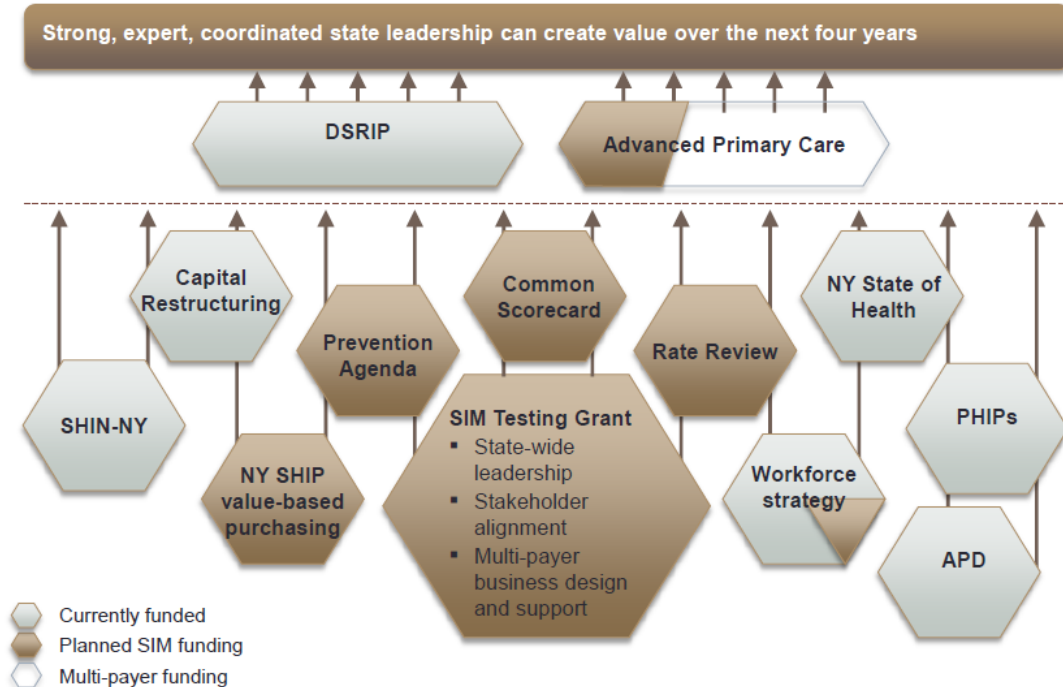

Over the next 48 months, NYS will receive ~\$99.9 million to implement and test the SHIP.

New York will promote a tiered **Advanced Primary Care**(APC) model. This model includes behavioral and population health integration, coupled with an appropriately trained workforce and engaged consumers, with supportive payment and common metrics. The state will:

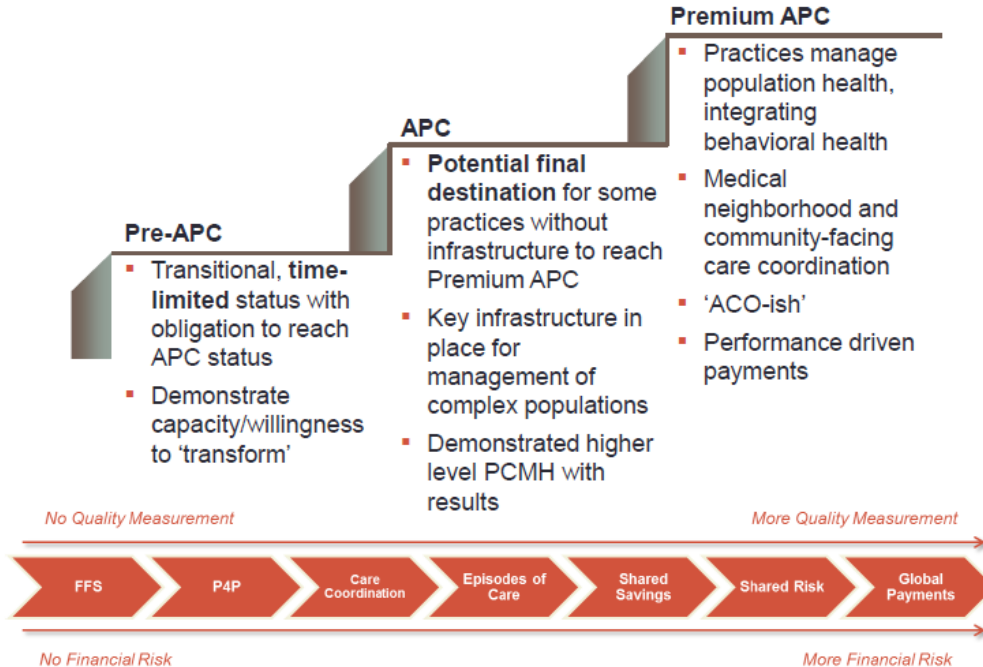

- 1) institute a statewide program of regionally-based primary care practice transformation activities to help practices across New York deliver ‘advanced primary care’;
- 2) expand the use of value-based payments so that 80% of New Yorkers are receiving value-based care by 2020;
- 3) support performance improvement and capacity expansion in primary care by expanding New York’s primary care workforce through innovations in professional education and training;
- 4) integrate APC with population health through Public Health Consultants funded to work with regional practice transformation and Population Health Improvement Program (PHIP) contractors;**
- 5) develop a common scorecard, shared quality metrics and enhanced analytics to assure that delivery system and payment models support three-part aim objectives; and
- 6) provide state-funded health information technology, including enhanced capacities to exchange clinical data and an all-payer database.

# THE SIM GRANT

## WILL SPUR INNOVATION AND CATALYZE CHANGE

# SHIP ADVANCED PRIMARY CARE (APC) MODEL

A critical goal of design and implementation is for multi-payer alignment on this multi-tiered model coupled with payment support for transformation, care management AND value-based payment.

# SHIP AND PHIPS

## Examples of Key Points of Intersection/Support

### 1. Access to Care Without Disparity:

1. Provide health disparities data to community partners to promote evaluation and best practices
2. Provide training to reduce health disparities

2. Integrated Care: Research regional interests and concerns, gather data and develop strategies to promote and support APC adoption

3. Workforce: Provide data and analytics to inform a regional workforce strategy to advance integrated care delivery and APC

4. Health Information Technology: Facilitate and support training and assistance for practices including health information technology integration

### 5. Population Health:

1. Collect, analyze and utilize data to identify regional needs, measure health system performance, support innovative strategies and monitor community health status;
2. Conduct regional consumer assessment of care delivery (primary care and behavioral health) and develop recommendations as necessary
