

SHIP/DSRIP WORKFORCE WORKGROUP

Mandate

Promote a NYS health workforce that supports and assures comprehensive, coordinated and timely access to care that promotes health and well-being. Make recommendations to the Health Innovation Council and the PPS Panel regarding workforce needs to support development and promotion of integrated care delivery to result in health improvement.

- Develop recommendations and provide guidance to DSRIP PPS' to support and evolve the health care workforce consistent with PPS goals and objectives.
- Provide guidance and recommendations on SIM-funded workforce initiatives including, but not limited to development of new rural primary care residency programs and demonstrations to retain physicians in the state.
- Identify existing educational and other resources available to educate, train and re-train individuals to promote a workforce that supports and promotes evolving care models including integrated care delivery and primary care as supported in both SHIP and DSRIP.
- Develop recommendations to align the supply of clinical and non-clinical health care workers in key geographies with current and emerging demands consistent with overarching SHIP and DSRIP goals and objectives.
- Develop recommendations regarding education and training needs to ensure promotion of capacities and capabilities needed to support integrated care delivery systems including but not limited to care coordinators, case managers and other roles necessary to promote integration and access to care across the continuum.
- Examine data and analytic resources currently available to assess current and future workforce needs, identify gaps and make recommendations.
- Coordinate efforts with COGME regarding issues related to GME and with the Rural Health Council regarding rural health issues.
