

NYSDOH Letter for Initial Enrollment in the Health Home Program

For Use by Designated Provider-led Health Homes

Dear _____ :

I am writing to welcome you to the New York State Health Home Program. The Department of Health set up the Health Home Program to offer you more services to deal with your health care needs so that you stay as healthy as you can be.

With the _____, you will have a Care Manager who will work with your doctors to:

- pay special attention to your health care needs,
- make sure you get the medical services you need; and
- help you get social services you may need, such as housing and food.

These extra services are free. You will get these services only if you want them. The choice is yours.

_____ is working with many health care and social service providers to give you Health Home services. A Care Manager will call you soon to give you more information and to answer any questions you may have about these extra services.

If you have questions or concerns, you can call toll free at _____.

Sincerely,
