1. Project Plan
Project Schedule (Attach MS Project or equivalent high level Gantt chart)
Plan for requirements tracing:
Proposed issue tracking and reporting plans:
Performance goals: (refer to Section 3.1.1 for miniminum Department standards and also include any vendor standards for performance)

Reliability:
How System Evolution will be accommodated:

2. Proposed infrastructure (include system architecture diagram and component details)
Production Site:
Development and Test sites:
Backup/Recovery, Failover, Disaster Recovery

3. Application Platform
Database:
Development Language(s):
Licensed products, open source/freeware:
Software tools:
Accessibility compliance plan:

4. Disaster Recovery Plan
(Attach separate document if necessary)

5. Description of Physician Profile Transition/Turnover

6. Proposed IT project team

Roles (i.e. Project Manager, Business Analyst, Application Developer)
    1)
    2)
    3)

7. Documentation Plan
Describe/list artifacts that will be created and supported:
