## Background

In New York, Medicaid enrollees living with significant behavioral health needs may be enrolled in a type of Medicaid managed care plan called a Health and Recovery Plan (HARP). These plans are designed to specifically address the needs of members living with mental health or substance use disorders by providing access to experienced behavioral health providers and offering services specialized for their needs. Specialized services include care coordination between medical and other providers, promoting wellness, and treatment adherence services.

The Consumer Assessment of Healthcare Providers and Systems (CAHPS®) survey is a comprehensive tool designed to assess consumers' experience with health care and health plans. CAHPS® is the questionnaire that asks health plan members about experiences with access to care, health care providers and health plans. The New York State Department of Health (NYSDOH) sponsors a CAHPS® survey every other year for the Medicaid managed care plans and uses the results to determine variation in member satisfaction among the plans. DataStat, Inc. conducted the survey on behalf of the NYSDOH in 2019. The instrument used for the administration of the survey was the CAHPS® 5.0H Adult Medicaid core survey, developed and tested nationally for assessing the performance of health plans.

The majority of question items addressed member's experience with their health care, such as getting care quickly, communication with doctors, and overall satisfaction with health care and with the health plan. The questionnaire was expanded to include 22 supplemental questions of particular interest to the NYSDOH. Rounding out the instrument was a set of questions collecting demographic data. In total, the questionnaire consisted of 67 questions. A copy of the modified CAHPS® questionnaire can be found in Appendix A.

## Executive Summary

In New York, the CAHPS® survey is administered to Medicaid managed care plan members every other year. For the 2019 administration, the NYSDOH focused on adult members of Medicaid managed care plans as well as members in Special Needs Plans (SNPs) and Health and Recovery Plans (HARPs). The survey included 13 HARPs in New York with a sampled goal of 1,500 adults per plan. Questionnaires were sent to 19,299 members following a mail only methodology during the period October 3, 2019, through December 31, 2019, using a standardized survey procedure and questionnaire. A total of 220 responses were received resulting in a 14.7% response rate. The disposition of surveys is contained at the end of this section.

Conclusions based on the information presented in this report should be tempered by a few caveats. First, for some questionnaire items, relatively small numbers of responses may be available due to skip patterns in the questionnaire. In order to present the most reliable information, results based on fewer than 30 observations are not presented in this report. Second, in some of the data presentations included in this report, correlation coefficients are computed to explore the relationship between different measures. High correlations, however, do not necessarily indicate causation. Finally, in many of the graphs and tables presented in this report, differences between the Statewide average and individual managed care plans are readily apparent. However, where these differences are not statistically significant they should be evaluated accordingly.

### Summary of Standard Rating Questions

Response options for standard rating questions ranged from 0 (worst) to 10 (best). In the table below, the achievement score represents the proportion of members who responded with a rating of "8", "9", or "10". HARP results are presented for Statewide, New York City (NYC), Rest of State and the plan. Plan results are compared to the HARP Statewide achievement scores and a significance level of .05 or less was considered statistically significant and "↑" or "↓" is placed at the top of the appropriate bar. Regional results are presented for additional information, but are not compared to the Statewide achievement scores.

Standard Ratings Questions (8, 9 or 10)

↑↓ Statistically significantly better/worse than HARP Statewide 2019.

### Summary of Standard Composites

A composite score is calculated for each of five domains of member experience: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service and Shared Decision Making. Composite achievement scores indicate the proportion of members who reported a positive experience within a given domain. Responses of "Usually" or "Always" indicate achievement for all composite measures except for Shared Decision Making, which uses "Yes" as the indicator of achievement. HARP results are presented for Statewide, New York City (NYC), Rest of State and the plan. Plan results are compared to the HARP Statewide achievement scores and a significance level of .05 or less was considered statistically significant and "↑" or "↓" is placed at the top of the appropriate bar. Regional results are presented for additional information, but are not compared to the Statewide achievement scores.

Standard Composites

↑↓ Statistically significantly better/worse than HARP Statewide 2019.

# Key Measure Summary

Plans	Getting Needed Care (Usually or Always)	Getting Care Quickly (Usually or Always)	How Well Doctors Communicate (Usually or Always)	Customer Service (Usually or Always)	Shared Decision Making (Yes)	Rating of all health care	Rating of personal doctor	Rating of specialist seen most often	Rating of health plan	Rating of treatment or counseling

## Trend Analysis - 2019 vs. 2017

The table below provides a snapshot of the items with the greatest point change, positive or negative, since 2017. All performance-related items in the questionnaire that were trendable were listed in descending order of point change, and testing was conducted to determine which trends were statistically significant. Two questions (Questions 8 and 10) cannot be trended and are not included in this analysis. Shown below are the ten items at the top of the list and the ten items at the bottom, with their 2017 and 2019 scores and results of the significance testing. In the table presented below, differences over time may be readily apparent. However, where these differences are not statistically significant they should be evaluated accordingly.

Question	Excellus 2019 Score	Excellus 2017 Score	Point Change	Composite/ Question Group
Q13f. Doctor or other health provider talked about alcohol or other drug use	46.3%	32.1%	+ 14.2 ▲	Single Items
Q56. Doctor or health provider discussed or provided methods and strategies to assist with quitting smoking or using tobacco	70.7%	58.6%	+ 12.1	Medical Assistance with Smoking Cessation
Q45. Health plan's customer service usually or always gave needed information or help	84.6%	73.1%	+ 11.5	Customer Service
Q17. Doctor/provider asked what you thought was best for you	82.8%	71.8%	+ 11.0	Shared Decision Making
Q55. Doctor or health provider recommended or discussed medication to assist with quitting smoking or using tobacco	82.6%	74.1%	+ 8.5	Medical Assistance with Smoking Cessation
Q16. Doctor/provider talked about reasons you might not want to take a medicine	77.5%	70.1%	+ 7.4	Shared Decision Making
Q13d. Doctor or other health provider talked about whether there was a period of time when you felt sad, empty or depressed	80.4%	72.9%	+ 7.4	Single Items
Q13c. Doctor or other health provider talked about things in your life that worry you or cause you stress	77.3%	70.2%	+ 7.1	Single Items
Q15. Doctor/provider talked about reasons you might want to take a medicine	96.6%	90.5%	+ 6.1	Shared Decision Making
Q21. Rating of all health care	71.6%	65.7%	+ 5.9	Ratings
Q52. Had flu shot or flu spray since September 1, 2018? [Displayed for Respondents 18-64 years old]	51.9%	54.3%	- 2.3	Single Items
Q6. Usually or always got an appt. for check-up or routine care as soon as you needed	83.2%	86.2%	- 3.0	Getting Care Quickly
Q13b. Doctor or other health provider talked about exercise or physical activity	71.6%	75.0%	- 3.4	Single Items
Q41. Rating of specialist seen most often	78.7%	82.8%	- 4.0	Ratings
Q37. Rating of personal doctor	75.7%	81.2%	- 5.6	Ratings
Q24. Usually or always easy to get treatment or counseling you needed for a personal or family problem through your health plan	78.0%	84.2%	- 6.2	Single Items
Q13e. Doctor or other health provider talked about smoking or using tobacco products	54.9%	61.2%	- 6.3	Single Items
Q48. Rating of health plan	75.2%	83.0%	- 7.8	Ratings
Q4. Usually or always got care right away as soon as you needed	82.4%	90.4%	- 8.0	Getting Care Quickly
Q25. Rating of treatment or counseling	58.9%	69.1%	- 10.2	Ratings

Better

Worse

▲ ▼ Statistically significantly higher/lower than 2017 score.

# Methodology

Adults who were current members of a NYSDOH HARP, ages 21 to 64, as of September 2019 and who had been enrolled for five out of the last six months were eligible to be randomly selected for the survey. Respondents were surveyed in English or Spanish. The survey was administered over a 12 week period using a mail only three wave protocol. The protocol consisted of a first questionnaire packet and reminder postcard to all selected members, followed by a second questionnaire packet to individuals who had not responded to the initial mailings.

## Survey Milestones

1. 1st questionnaire packets mailed: October 3, 2019
2. Reminder postcards mailed: October 10, 2019
3. 2nd questionnaire packets mailed: November 7, 2019
4. Field closed: December 31, 2019

## Sampling Frame

A stratified random sample was drawn with the goal of selecting 1,500 eligible adults for each of the HARPs. To be eligible, individuals had to be current members, aged 21 to 64, who were continuously enrolled in the plan for at least five out of the last six months as of September 2019.

## Questionnaire

The instrument selected for the survey, the CAHPS® 5.0H Adult Medicaid core survey, was developed and tested nationally for use in assessing the performance of health plans. The majority of questions addressed domains of member experience such as getting care quickly, doctor communication, overall satisfaction with health care and health plan. The questionnaire was expanded to include 22 supplemental questions of particular interest to the NYSDOH. Rounding out the questionnaire was a set of questions collecting demographic data. In total, the questionnaire consisted of 67 questions. A copy of the modified CAHPS® questionnaire can be found in Appendix A.

## Selection of Cases for Analysis

Questionnaires were considered complete if respondents did not say 'No' to Question 1 (Our records show that you are now in [HEALTH PLAN NAME]. Is that right?) and if they provided a valid response to at least three of the five questions: Q3, Q29, Q38, Q44, Q48. Complete interviews were obtained from 220 NYSDOH HARP members, and the overall project response rate was 14.7%.

## Definition of Achievement Scores

Member responses to questionnaire items are summarized as achievement scores. Responses that indicate a positive experience are labeled as achievements, and an achievement score is computed equal to the proportion of responses qualifying as achievements. Since achievement scores for questions represent the proportion of respondents who indicate a positive experience, the lower the achievement score, the greater the need for improvement. See the *Responses by Question* section for assignment of achievement responses for each question.

In general, somewhat positive responses are included with positive responses as achievements. For example, a response of "Usually" or "Always" to the question "How often did you get an appointment for health care at a doctor's office or clinic as soon as you needed?" is considered an achievement, as are responses of "8", "9", or "10" to rating questions.

## Composites

Five standard composite scores summarize responses in key areas: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service, and Shared Decision Making. The achievement score for the composite is the average of the achievement scores for the individual items comprising a composite. Following is a list of the questions that comprise each composite:

### Getting Needed Care

- Q22. Usually or always got care, tests or treatment, you thought you needed
- Q39. Usually or always get an appointment to see a specialist as soon as you needed

### Getting Care Quickly

- Q4. Usually or always got care right away as soon as you needed
- Q6. Usually or always got an appt. for check-up or routine care as soon as you needed

### How Well Doctors Communicate

- Q31. Personal doctor usually or always explained things in way that was easy to understand
- Q32. Personal doctor usually or always listened carefully to you
- Q33. Personal doctor usually or always showed respect for what you had to say
- Q34. Personal doctor usually or always spent enough time with you

### Customer Service

- Q45. Health plan's customer service usually or always gave needed information or help
- Q47. Usually or always treated with courtesy and respect by health plan's customer service staff

### Shared Decision Making

- Q15. Doctor/provider talked about reasons you might want to take a medicine
- Q16. Doctor/provider talked about reasons you might not want to take a medicine
- Q17. Doctor/provider asked what you thought was best for you

## Correlation to Satisfaction

To understand the relationship between performance and satisfaction in particular areas of member experience, correlations are computed between responses to the question items comprising the five composites and each of the ratings questions. The specific correlation computed is Pearson's Correlation Coefficient, which takes on values between -1 to 1. Correlation scores are presented in the *Correlation Analysis* section.

## Comparisons: Current Year and Trending

Two types of comparisons are presented. Current year comparisons are found in the *Executive Summary* and *Graphs* sections. In the *Executive Summary* section, plan level results for the Standard Ratings and Composites are compared to the Statewide achievement score, with statistical testing. Regional results are presented for comparison. In the *Graphs* section plan level results for each performance measure are compared to the Statewide achievement score, with statistical testing. Regional results are presented for additional information, but are not compared to the Statewide achievement scores.

Comparisons across time are the focus of the *Trend Analysis* section: all performance-related items in the questionnaire that were trendable were listed in descending order of point change. The *Trend Analysis* section displays, for the plan, the ten items at the top of the list and the ten items at the bottom, with the 2017 and 2019 scores and results of significance testing. In addition, in the *Responses by Question* section, for each performance item, the achievement score point change is displayed along with results of significance testing.

---

## Statistical Testing

Statistically significant differences between scores were determined using t-tests. A significance level of .05 or less was considered statistically significant and "↑" or "↓" is placed at the top of the appropriate bar or next to the appropriate achievement score.

## Case-Mix Analysis

The majority of achievement scores presented in this report are case-mix adjusted to control for differences in the member population across managed care plans. The results for 2019 are case-mix adjusted for age (Q60), health status (Q50) and education (Q62). Case-mix adjustment is applied to mitigate the effect of differences in individual plan's member population. The variables chosen for case-mix adjustment are beyond the control of the managed care plan and have been shown to affect managed care plan and health care ratings. For example, individuals with higher levels of education generally rate lower for satisfaction. Details about the distribution of populations in categories for the three adjusters can be seen in the *Respondent Sample Profile* contained in the *Executive Summary* section.

All achievement scores based on questions in the "About Your Health" and "About You" sections are not case-mix adjusted. Case-mix adjustment is also not applied to the achievement scores for the Question 13 series.

## Using this Report

### Understanding Achievement Scores

This report is designed to assist the NYSDOH and participating health plans in identifying key opportunities to improve members' experiences. Member responses to questions are summarized as achievement scores. Responses that indicate a positive experience are labeled as achievements, and an achievement score is computed as the proportion of responses qualifying as positive. Responses of "Yes" are considered achievements for the Shared Decision Making composite. For all other composites, responses of "Usually" or "Always" are considered achievements. For example, a response of "Usually" or "Always" to the question "How often did you get care as soon as you needed?" is considered a positive response, and the achievement score for this question is equal to the proportion of respondents who answered the question with "Usually" or "Always". Because achievement scores for questions are computed as the proportion of members who indicate a positive experience, the lower the achievement score, the greater the need to improve.

Achievement scores are computed and reported for all pertinent questions. In addition, composite scores are built from groups of questions that make up broad domains of members' experience: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service, and Shared Decision Making.

Achievement scores based on fewer than 30 observations are suppressed in this report and "NA" is substituted for the result. When relevant, a footnote is presented. Typically, too few responses are due to skip patterns in the questionnaire. Suppressing scores based on a small number of cases ensures that this report includes the most reliable information available.

### Understanding the Sections of the Report

The CAHPS® survey results are presented here in a format that is optimized for use in practical decision-making. Specifically, these reports can:

1. Assist the NYSDOH and health plans in identifying strengths and weaknesses in quality of health care, access and services, and
2. Provide the NYSDOH and health plans with a way to assess where resources can best be allocated to improve experiences.

The remainder of the report is broken into three major sections that are briefly described here to help you make the best use of the report and the information it contains.

#### *Graphs/Results*

This section contains a graphic presentation of the HARP Statewide, NYC, Rest of State and plan specific results for questions using the achievement scores. Statistical significance, the achievement score, and the number of respondents for each plan are displayed. This depicts plan specific performance compared to the HARP Statewide and peers. The composites are directly followed by the individual questions that are combined to create composite measures.

#### *Correlation Analysis*

The Correlation Analysis section is helpful in understanding how satisfaction in various questions relates to the four standard rating questions (personal doctor, specialist seen most often, all health care, and health plan) for respondents. The charts show which questions are most strongly linked to the rating and the current achievement score. The information helps define what areas are related to satisfaction and how the plan performed in that area. The section enables a quick view of how composite questions correlate across ratings.

The correlation analyses are presented two ways. First there are correlations of the top ten highly correlated composite questions to the four rating questions ranked by the highest correlation between the question and rating. This allows a visual picture of clustering of composites across ratings. The second analysis presents the proportion

of responses in each response option for each composite question for each individual rating. This lets you see where there may be an opportunity for improvement. For example, if a question correlates highly and has higher proportions of "usually" and "sometimes", improving the processes may move respondents up to "always" to improve not only that composite, but the other rating questions.

*Responses by Question*

This section provides a breakdown for each question with the number of members responding to the question and the distribution for each available response option. For each question that has responses determined to be positive or negative, there is a colored circle indicating achievement (green circle) or room for improvement (red circle). The circles are based on the response category and are not indicative of areas the plan needs to improve necessarily. For example, "Always" and "Usually" are achievement and "Sometimes" and "Never" are room for improvement. Similarly on a rating question, "8", "9", or "10" are achievement and 0 through 7 are room for improvement. Questions without a colored circle indicate the question is not associated with this type of response determination. For example, asking whether a member needed a service in the past six months does not have an associated achievement score. Achievement scores based on fewer than 30 observations are suppressed and "NA" is substituted for the result. This section provides additional information about volume of members to help you prioritize areas to be addressed.

When applicable, each question is represented with the composite name, the achievement score, the correlation with rating of health plan and trend information. The achievement scores are case-mix adjusted while data for each response option are not case-mix adjusted. Achievement scores for the Question 13 series, the "About Your Health" and "About You" sections are not case-mix adjusted.

---

---

## Graphs/Results

The Graphs/Results sections contains a graphic presentation of the HARP Statewide, NYC, Rest of State and plan specific results for each question using the achievement scores. Statistical significance, the achievement score, and the number of respondents for each plan are displayed. This depicts plan specific performance compared to various benchmarks or peers. Rating results are followed by composites and the questions that make up each composite. Medical Assistance with Smoking Cessation and Single Items can be found at the end of this section.

The CAHPS® 5.0H survey uses a 0-10 rating for assessing overall experience with personal doctors, specialists, health care and health plans. In the four ratings graphs, proportions of respondents assigning ratings of "8", "9", or "10" are reported as achievement scores.

Questions that relate to the same broad domain of performance are grouped together for the purpose of reporting. For example, the domain "Getting Care Quickly" includes questions about how soon appointments were scheduled. Composite achievement scores reflect responses of "Usually" or "Always" for the first four composites. Responses of "Yes" are considered achievements for the Shared Decision Making composite. Graphs presenting the results of individual questions that make up the composite score follow the presentation of the composite results.

For full detail of response options for each question and which responses qualify as achievements, please refer to the Responses by Question section.

In this report, results based on fewer than 30 cases are suppressed and "NA" is substituted for the result. When relevant, a footnote is presented.

## Overall Ratings

### Q21. Rating of all health care (8, 9 or 10)

↕ Statistically significantly better/worse than HARP Statewide 2019.

## Overall Ratings

### Q37. Rating of personal doctor (8, 9 or 10)

■ HARP Statewide 2019    
 ■ NYC 2019    
 ■ Health Plans 2019  
■ Rest of State 2019

## Overall Ratings

### Q41. Rating of specialist seen most often (8, 9 or 10)

■ HARP Statewide 2019    
 ■ NYC 2019    
 ■ Health Plans 2019  
■ Rest of State 2019

## Overall Ratings

### Q48. Rating of health plan (8, 9 or 10)

■ HARP Statewide 2019    
 ■ NYC 2019    
 ■ Health Plans 2019  
■ Rest of State 2019

# Overall Ratings

## Q25. Rating of treatment or counseling (8, 9 or 10)

↕ Statistically significantly better/worse than HARP Statewide 2019.

## Composites

### Getting Needed Care (Usually or Always)

## Excellus Health Plan, Inc.

The Correlation Analysis section is helpful in understanding how results in various questions relate to the four standard ratings (personal doctor, specialist seen most often, all health care, and health plan) for respondents. This allows for evaluation of which questions are most strongly linked to the rating and what the current achievement score is. The section can be used for a quick view of how composite questions correlate across ratings.

The correlation analyses are presented two ways. There is a table summarizing correlations of the top ten highly correlated standard composite questions to the four rating questions ranked by the highest correlation between the question and rating. This allows a visual picture of clustering of composites across ratings. Each question in a composite is represented with the individual question number, composite name, achievement score and the correlation value.

### Example:

If Getting Needed Care and How Well Doctors Communicate have higher correlations across the ratings, you can see how these aspects are important to members and influence how satisfied they are with their providers, health care, and health plan. Likewise, composites clustered toward the bottom may indicate areas of lower importance to the members. The visual also allows you to see areas where you can improve. If you are performing poorly in Getting Needed Care, and it is important to the members' satisfaction with care, this could be a compelling reason to focus on improving this area. It also lets you see how different questions within a composite correlate individually.

The summary is followed by four tables presenting more detailed data on composite questions for each individual rating. The questions are written out and you can see the proportion of responses for each response option. This lets you see where an opportunity for improvement may lie. For example, if a question correlates highly and has higher proportions of "sometimes" and "never", improving the processes may move respondents up to "always" which will improve not only that composite, but the other rating questions.

## Correlation Summary

# Responses by Question

This section presents each question and the distribution for each available response option. For each question that has responses determined to be positive or negative, there is a colored circle indicating achievement (green circle) or room for improvement (red circle). The circles are based on the response category and are not indicative of areas the plan needs to improve necessarily. When applicable, each question is presented with the composite name, the achievement score, the correlation value and trend information. In this section, a t-test is used to determine significant differences across time where 2019 scores are compared to 2017 scores when applicable. A significance level of .05 or less was considered statistically significant and "↑" or "↓" is placed next to the appropriate achievement score change. The achievement scores are case-mix adjusted while data for each response option are not case-mix adjusted. Achievement scores for the Question 13 series, the "About Your Health" and "About You" sections are not case-mix adjusted.

All information that would let someone identify you will be kept private. The New York State Department of Health and DataStat will not share your personal information with anyone without your OK. You may choose to answer this survey or not. If you choose not to, this will not affect the benefits you get.

Your responses to this survey are completely confidential. Once you complete the survey, place it in the envelope that was provided, seal the envelope, and return the envelope to DataStat.

You may notice a barcode number on the front of this survey. This number is ONLY used to let us know if you returned your survey so we don't send you reminders.

If you want to know more about this study, please call 1-877-455-3394.

SURVEY INSTRUCTIONS

- Please be sure to fill the response circle completely. Use only black or blue ink or dark pencil to complete the survey.

Incorrect Marks

- You are sometimes told to skip over some questions in the survey. When this happens you will see an arrow with a note that tells you what question to answer next, like this:

- Yes → Go to Question 1
- No

START HERE

1. Our records show that you are now in [HEALTH PLAN NAME]. Is that right?

- Yes → Go to Question 3
- No → Go to Question 2

2. What is the name of your health plan? (please print)

## YOUR HEALTH CARE IN THE LAST 6 MONTHS

These questions ask about your own health care. Do not include care you got when you stayed overnight in a hospital. Do not include the times you went for dental care visits.

3. In the last 6 months, did you have an illness, injury, or condition that needed care right away in a clinic, emergency room, or doctor's office?

Yes → *Go to Question 4*  
 No → *Go to Question 5*

4. In the last 6 months, when you needed care right away, how often did you get care as soon as you needed?

Never  
 Sometimes  
 Usually  
 Always

5. In the last 6 months, did you make any appointments for a check-up or routine care at a doctor's office or clinic?

Yes → *Go to Question 6*  
 No → *Go to Question 7*

6. In the last 6 months, how often did you get an appointment for a check-up or routine care at a doctor's office or clinic as soon as you needed?

Never  
 Sometimes  
 Usually  
 Always

7. In the last 6 months, did you need care for yourself during evenings, weekends, or holidays?

Yes → *Go to Question 8*  
 No → *Go to Question 9*

8. In the last 6 months, how often were you able to get the care you needed from a doctor's office or clinic during evenings, weekends, or holidays?

Never  
 Sometimes  
 Usually  
 Always

9. In the last 6 months, did you contact your personal doctor's office or clinic with a medical question after regular office hours?

Yes → *Go to Question 10*  
 No → *Go to Question 11*

10. In the last 6 months, when you contacted your personal doctor's office or clinic after regular office hours, how often did you get an answer to your medical question as soon as you needed?

Never  
 Sometimes  
 Usually  
 Always

11. In the last 6 months, not counting the times you went to an emergency room, how many times did you go to a doctor's office or clinic to get health care for yourself?

None → *Go to Question 23*  
 1 → *Go to Question 12*  
 2 → *Go to Question 12*  
 3 → *Go to Question 12*  
 4 → *Go to Question 12*  
 5 to 9 → *Go to Question 12*  
 10 or more → *Go to Question 12*

12. In the last 6 months, did you and a doctor or other health provider talk about specific things you could do to prevent illness?

Yes  
 No

13. In the last 6 months, did you and a doctor or other health provider talk about any of the following?

	Yes	No
a. Healthy diet and eating habits	<input type="radio"/>	<input type="radio"/>
b. Exercise or physical activity	<input type="radio"/>	<input type="radio"/>
c. Things in your life that worry you or cause you stress	<input type="radio"/>	<input type="radio"/>
d. Whether you felt sad, empty, or depressed	<input type="radio"/>	<input type="radio"/>
e. Smoking or using tobacco products	<input type="radio"/>	<input type="radio"/>
f. Alcohol or other drug use	<input type="radio"/>	<input type="radio"/>

14. In the last 6 months, did you and a doctor or other health care provider talk about starting or stopping a prescription medicine?

- Yes → *Go to Question 15*
- No → *Go to Question 18*

15. Did you and a doctor or other health provider talk about the reasons you might want to take a medicine?

- Yes
- No

16. Did you and a doctor or other health provider talk about the reasons you might not want to take a medicine?

- Yes
- No

17. When you talked about starting or stopping a prescription medicine, did a doctor or other health provider ask you what was best for you?

- Yes
- No

18. In the last 6 months, did a doctor or other health provider order a blood test, x-ray or other test for you?

- Yes → *Go to Question 19*
- No → *Go to Question 21*

19. When a doctor or other health provider ordered a blood test, x-ray or other test for you, how often did someone from this doctor's office follow up to give you those results?

- Never
- Sometimes
- Usually
- Always

20. In the last 6 months, how often were the results of your blood test, x-ray or other test easy to understand?

- Never
- Sometimes
- Usually
- Always

21. Using any number from 0 to 10, where 0 is the worst health care possible and 10 is the best health care possible, what number would you use to rate all your health care in the last 6 months?

- 0 1 2 3 4 5 6 7 8 9 10  
 Worst Health Care Health Care  
 Possible Possible

22. In the last 6 months, how often was it easy to get the care, tests, or treatment you needed?

- Never
- Sometimes
- Usually
- Always

23. In the last 6 months, did you need any emotional or mental health treatment or counseling for a personal or family problem?

- Yes → *Go to Question 24*
- No → *Go to Question 26*

24. In the last 6 months, how often was it easy to get the emotional or mental health treatment or counseling you needed through your health plan?

- Never
- Sometimes
- Usually
- Always

25. Using any number from 0 to 10, where 0 is the worst treatment or counseling possible and 10 is the best treatment or counseling possible, what number would you use to rate all your emotional or mental health treatment or counseling in the last 6 months?
