

Polio Vaccination Rates by Zip Code: Rockland County

This report is based on data as of August 1, 2022 from the New York State Immunization Information System (NYSIIS). The rates below are calculated based on data of children that have received 3 polio immunizations by 2 years of age, reported their residency as the State of New York, provided their New York State county of residence, and have at least one immunization or have a New York State birth record outside of New York City. As of January 8, 2008, all healthcare providers in New York State are required to report all immunizations administered to people less than 19 years of age, along with the person's immunization histories, to NYSDOH using NYSIIS. New York City maintains their own non-COVID-19 immunization records through the Citywide Immunization Registry (CIR). Please note, data is not available for zip codes where there are less than 20 residents in the eligible age range, due to small base sizes.
