2023 Mosquito-borne Illness Weekly Report Nov 05 - Nov 11 (MMWR Week 45)

NYSDOH STATEWIDE MOSQUITO-BORNE DISEASE ACTIVITY REPORT November 15, 2023

The New York State Department of Health (NYSDOH) collects, compiles, and analyzes information on mosquito-borne disease activity in New York State (NYS) and produces this weekly report. Data in this report reflects testing performed by both NYSDOH's Wadsworth Center Laboratories (WC) and the New York City Department of Health and Mental Hygiene's (NYCDOHMH) Public Health Laboratory (PHL).

Weekly Summary (November 05 - November 11)

- West Nile Virus (WNV):
 - 0 WNV-positive mosquito pools¹ have been identified in NYS, outside of NYC².
 - WNV-positive mosquito activity has been reported from 0 NYC counties.
 - 2 human cases of WNV infection have been reported, outside of NYC.
 - (Nassau 1, Rockland 1)
 - 1 equine case of WNV infection has been reported. (Westchester 1)
 - 0 presumptive viremic donors³ have been reported, outside of NYC.
- Eastern Equine Encephalitis Virus (EEEV):
 - 0 EEEV-positive mosquito pools have been identified.
 - 0 human cases of EEEV infection have been reported.
 - 0 equine cases of EEEV infection have been reported.
 - 0 caprine cases of EEEV infection have been reported.
 - 0 ratite cases of EEEV infection have been reported.
- Zika Virus (ZIKV):
 - Aedes albopictus has been identified in 4 counties outside of NYC. Aedes aegypti has not been identified anywhere in the state.
 - 0 mosquito pools have been positive for Zika virus.
 - 0 human cases of ZIKV infection have been reported to NYSDOH. No cases of local mosquito-borne transmission⁴ (LMBT) have been identified.
- Chikungunya Virus (CHIKV), Dengue Virus (DENV), and Malaria⁵:
 - 0 human cases of CHIKV infection have been reported to NYSDOH. 0 cases of LMBT have been identified.
 - 3 human cases of DENV infection have been reported to NYSDOH. 0 cases of LMBT have been identified.
 - 1 human case of malaria infection has been reported to NYSDOH. 0 cases of LMBT have been identified.

¹ Mosquito specimens collected by county surveillance staff are grouped into one or more "pools" of specimens according to their collection location, collection date, and species. A positive pool refers to a mosquito pool in which at least one specimen was positive for a given pathogen.

² Data pertaining to New York City municipalities in this report are derived from the NYC Department of Mental Health and Hygiene (NYCDOHMH) website

(https://www.nyc.gov/site/doh/health/health-topics/west-nile-virus.page) and only reflect WNV+ mosquito pools. NYCDOHMH does not report the total number of pools collected or tested. Consequently, some fields relating to NYC cannot be calculated and have been omitted from this report.

³ Presumptive viremic donors (PVDs) are people who had no symptoms at the time of donating blood (people with symptoms are deferred from donating)

through a blood collection agency, but whose blood tested positive in preliminary tests when screened West Nile virus. Some PVDs develop symptoms after donation, at which point they would be included in the count of human cases by their state.

⁴ Local mosquito-borne transmission is defined by the absence of the following epidemiological risk factors: recent travel to a country or region with known active ZIKV transmission OR sexual contact with a recent traveler from these areas; recent blood transfusion; recent laboratory exposure to ZIKV; or mother-to-child transmission during pregnancy. NYCDOHMH directly reports human cases of ZIKv infection to CDC.

⁵ NYCDOHMH directly reports human cases of CHIKV, DENV and malaria infection to CDC.

Year to Date Summary (01/01/2023 - 11/11/2023)

- West Nile Virus (WNV):
 - 335 WNV-positive mosquito pools¹ have been identified in NYS, outside of NYC².
 - 1146 WNV-positive mosquito pools have been reported from NYC counties.
 - 30 human cases of WNV infection have been reported, outside of NYC.
 - 32 human cases of WNV infection have been reported from NYC.
 - 5 equine cases of WNV infection have been reported.
 - 1 presumptive viremic donor³ has been reported, outside of NYC.
 - 1 presumptive viremic donor has been reported from NYC counties.
- Eastern Equine Encephalitis Virus (EEEV):
 - 19 EEEV-positive mosquito pools have been identified.
 - 0 human cases of EEEV infection have been reported.
 - 9 equine cases of EEEV infection have been reported.
 - 0 caprine cases of EEEV infection have been reported.
 - 0 ratite cases of EEEV infection have been reported.
- Zika Virus (ZIKV):
 - Aedes albopictus has been identified in 4 counties outside of NYC. Aedes aegypti has not been identified anywhere in the state.
 - 0 mosquito pools have been positive for Zika virus.
 - 0 human cases of ZIKV infection have been reported to NYSDOH. No cases of local mosquito-borne transmission⁴ (LMBT) have been identified.
- Chikungunya Virus (CHIKV), Dengue Virus (DENV), and Malaria⁵:
 - 11 human cases of CHIKV infection have been reported to NYSDOH. 0 cases of LMBT have been identified.
 - 53 human cases of DENV infection have been reported to NYSDOH. 0 cases of LMBT have been identified.
 - 86 human cases of malaria infection have been reported to NYSDOH. 0 cases of LMBT have been identified.

¹ Mosquito specimens collected by county surveillance staff are grouped into one or more "pools" of specimens according to their collection location, collection date, and species. A positive pool refers to a mosquito pool in which at least one specimen was positive for a given pathogen.

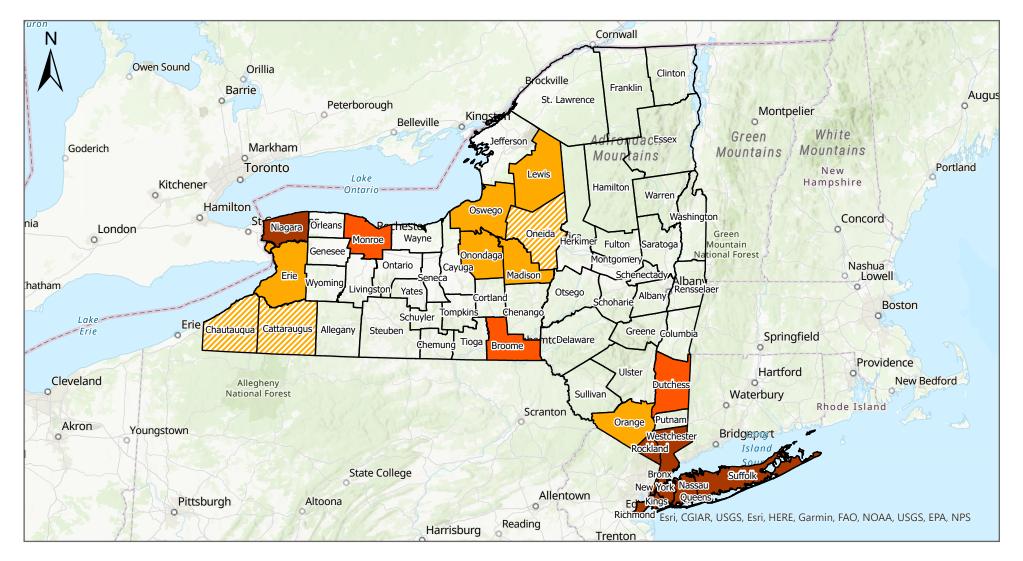

² Data pertaining to New York City municipalities in this report are derived from the NYC Department of Mental Health and Hygiene (NYCDOHMH) website (https://www.nyc.gov/site/doh/health/health-topics/west-nile-virus.page) and only reflect WNV+ mosquito pools. NYCDOHMH does not report the total number of pools collected. Consequently, some fields relating to NYC cannot be calculated and have been omitted from this report.

³ Presumptive viremic donors (PVDs) are people who had no symptoms at the time of donating blood (people with symptoms are deferred from donating) through a blood collection agency, but whose blood tested positive in preliminary tests when screened West Nile virus. Some PVDs develop symptoms after donation, at which point they would be included in the count of human cases by their state.

⁴ Local mosquito-borne transmission is defined by the absence of the following epidemiological risk factors: recent travel to a country or region with known active ZIKV transmission OR sexual contact with a recent traveler from these areas; recent blood transfusion; recent laboratory exposure to ZIKV; or mother-to-child transmission during pregnancy. NYCDOHMH directly reports human cases of ZIKV infection to CDC.

⁵ NYCDOHMH directly reports human cases of CHIKV, DENV and malaria infection to CDC.

2023 West Nile Virus Surveillance Summary

*The number of WNV positive mosquitoes, mammal infections, or human cases depends, in part, on the amount of surveillance and testing performed in each county, and is not necessarily associated with the degree of WNV infection risk.

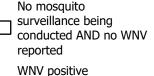

-- Map shows results reported through date range indicated.

Human cases of WNV reported AND WNV positive mosquitoes OR mammals reported

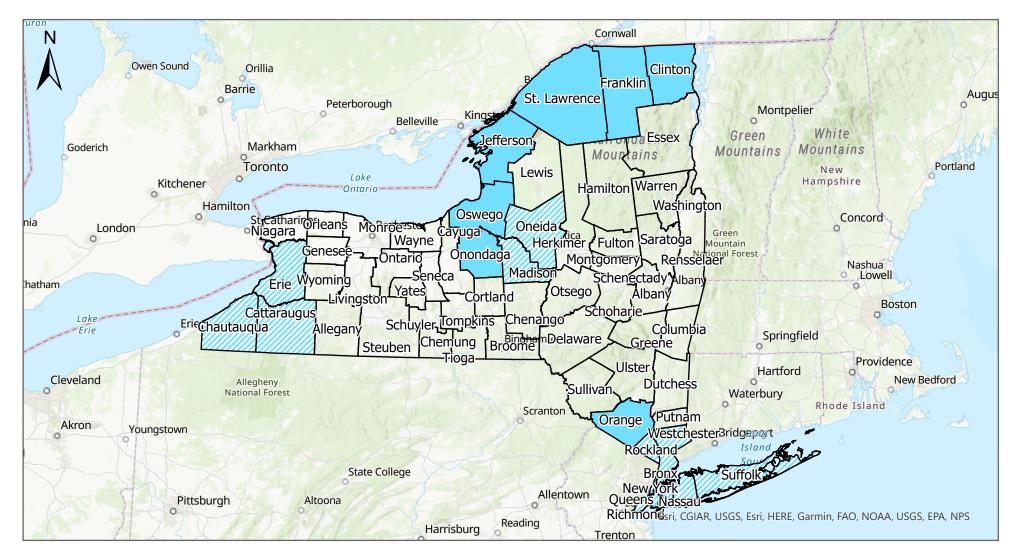

Human cases of WNV reported AND no WNV positive mosquitoes reported

Mosquito surveillance being conducted AND no WNV reported

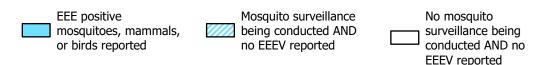

NYSDOH, BCDC - November 11, 2023 Map Scale: 1:4,019,896 mosquitoes OR mammals reported

2023 Eastern Equine Encephalitis Virus Surveillance Summary

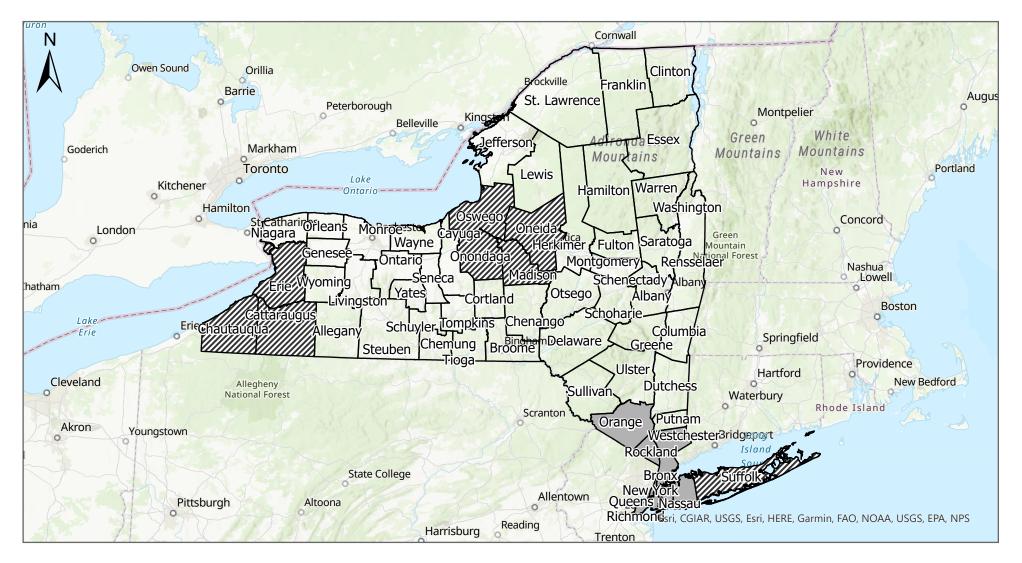

*The number of EEEV positive mosquitoes, mammal infections, or human cases depends, in part, on the amount of surveillance and testing performed in each county, and is not necessarily associated with the degree of EEE infection risk.

-- Map shows results reported through date range indicated.

Surveillance Summary (01/01/2023 - 11/11/2023)

2023 Aedes aegypti/albopictus Surveillance Summary

*The total number of Aedes aegypti or albopictus identified within a county depends on the amount of surveillance performed in each county, and is not necessarily associated with degree of Zika risk.

-- Map shows results reported through date range indicated.

Surveillance Summary (01/01/2023 - 11/11/2023)

LMBT - Local Mosquito-borne Transmission

* Jurisdiction conducting mosquito surveillance † NYCDOHMH directly reports human cases of ZIKv infection to CDC

West Nile Virus Mosquito Pool Positivity by Species

Mosquito Species

Fig 3. Weekly summary of West Nile virus positivity by mosquito species. Numbers within each bar represent the number of total pools tested.

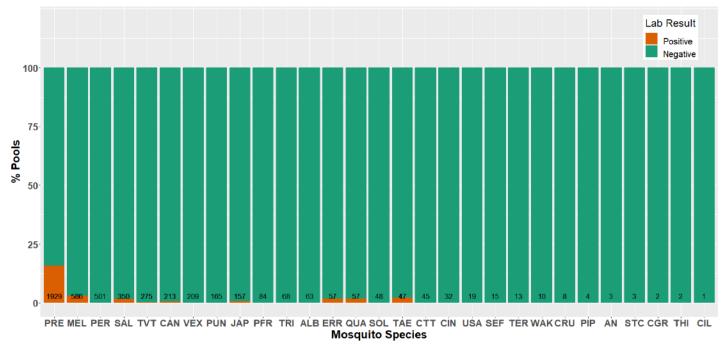

Fig 4. Year-to-date summary of West Nile virus positivity by mosquito species. Numbers within each bar represent the number of total pools tested.

Abbreviation	Species	Abbreviation	Species	Abbreviation	Species
ALB	Ae. albopictus	ERR	Cx. erraticus	STC	Ae. sticticus
CIN	Ae. cinereus	PIP	Cx. pipiens	SEF	Ae. stimulans gr.
VEX	Ae. vexans	PRE	Cx. pipiens-restuans	TAE	Ae. taeniorhynchus

MEL	Cs. melanura	SOL	Ae. sollicitans		

Seasonality of Human Cases

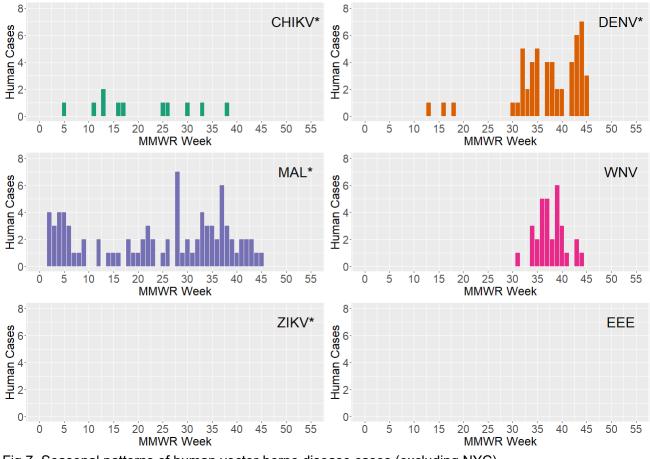

Fig 7. Seasonal patterns of human vector-borne disease cases (excluding NYC)

^{*} No cases of local mosquito-borne transmission; all cases to date are travel-related.

United States Mosquito-borne Disease Surveillance and Other Information

Current and historic nationwide surveillance information on mosquito-borne illnesses in the United States can be found at: (https://www.cdc.gov/fight-the-bite/at-risk/index.html)

- Specific information about WNV, including statistics and maps, can be found at: (http://www.cdc.gov/westnile/)
- Specific information about EEEv, including statistics and maps, can be found at: (http://www.cdc.gov/EasternEquineEncephalitis)
- Specific information about Zika virus, including statistics and maps of areas with active mosquito-borne transmission of Zika virus can be found at: (http://www.cdc.gov/zika/)
- Specific information about chikungunya virus, including statistics and maps, can be found at: (http://www.cdc.gov/chikungunya/)
- Specific information about dengue fever, including statistics and maps, can be found at can be at: (http://www.cdc.gov/dengue/)
- Specific information about malaria, including statistics and maps, can be found here at: (http://www.cdc.gov/malaria/)
