

# **Mosquito Bite Prevention** for **Travelers**

Mosquitoes spread many types of viruses and parasites that can cause diseases including chikungunya, dengue, Zika, and malaria.

Protect yourself and your family from mosquito bites. Here's how:

#### Cover up!

Wear long sleeved shirts and pants.

### Use an EPA-registered insect repellent.

Follow the label instructions carefully.

#### If you are travelling with a baby or child:

Do not use insect repellent on babies younger than 2 months of age.

Dress children in clothing that covers arms and legs.

## Keep mosquitoes out of your hotel room or lodging.

Look for air conditioning or screens on windows and doors.

Pregnant women should not travel to Zika areas. If you *must* travel, take extra precautions.
