Figure 1.01
(Investigation Case)

Figure 1.02
(Investigation Letters)

Figure 1.03
(Investigation Reports)
Figure 1.04
(Investigation Status Modification)
Figure 2.01
(Agency Information)
This is the most used screen of data fields. It contains all of the data pertinent to law and regulation for our certified ambulance services. Example is entity name, legal authorized territory in which the service can operate, physician medical director info, point of contact info, certification expiration date among other data points.

Figure 2.02
(Controlled Substance Info)
This is a screenshot of controlled substance license info for EMS response agencies (ambulance services). Entity name, license number, agent info and expiration date among other critical data points is included.

Figure 2.03
(Approvals/Certifications)
This screenshot included what we call adjunct levels of care, certificate control numbers and personnel data for the ambulance service. Each operating certificate that is issued (usually every other year) has its own unique identifier known as a cert control number.
Figure 2.04
(County Resources)
This screenshot is useful for our work with counties across the state especially when it comes to times of disaster when a large mobilization of ambulance services from across the state need to be deployed to the disaster area for support. Examples would be 9/11, Superstorm Sandy, the 1998 ice storms, and severe flooding in the Susquehanna River Basin in 2006 and 2011. We reach out to county points of contact like this one that coordinate local response to

Figure 2.05
(Part 18 Mass Gathering)
This screenshot is for Title 10 NYCRR Part 18 (mass gathering) permit approvals. When a public event is expected to draw more than 5,000 people, a permit is required. This screen has important data points relative to the Part 18 approval.

Figure 2.06
(Public Access Defibrillation)
Article 30 Public Health Law (PHL) has a section related to Public Access Defibrillation (PAD).
This screenshot captures data related to PAD and the thousands of entities across NYS that provide this service to the general public (versus patient specific order/prescription).
Current process is that this form is updated:

1. On initial application for ePCR capability
2. On transition to a new ePCR platform
3. On bi-annual agency renewal

Ideally, this screen will show effective dates with each software platform and document the updates or revisions (ePCR coordinator, staff change, software platform change, REMSCO / Program Agency endorsement change, NEMSIS software standard / platform)

Figure 3.02
(Course Menu)

Select a Transaction Type:

- Add a New Course
- Update a Course
- Exam Dates
- Letters

Submit  Close

Figure 3.03
(Search Course)

Searching Mechanism:

1. Search by Sponsor Name
2. Search by Sponsor County
3. Search by Sponsor Number
4. Search by Course Number
**Figure 3.04**
*(Course Update)*

Course Tracking Component Connecting Data From:

- Course Number
- Course Locations
- Update Student Status List
- Assign Exam Proctor
- (Examination Eligible)
- Print Course Record
- Print Course Label
- View Instructor

**Figure 3.05**
*(Course Registration)*

Course Registration Related Data:

1. Course Number
2. Sponsor
3. Instructor
4. Enrollment Counts (Course Main Page)
5. Eligible for Funding (Agency Connection)
6. EMT Student Entry

**Figure 3.06**
*(EMT Search)*

EMT Database Search Related Data

1. Search by EMT Number
2. Search by Last Name
3. Search by SSN
4. Search by Last 4 Digits of SSN
1. Search by EMT (name or number)
2. View Agency
3. 45 Day Violation Log
4. Reports

(Reciprocity Menu)
Either select “Create a record without an EMT number” if it is a new applicant

OR

Search by the applicant’s EMT number or Last name.

Once you have selected “Create a record without an EMT number” this screen appears. You then enter all the applicant’s information from the paper application. Select whether the application is Pending/approved/denied.

Once the applicant’s information is entered select the “record funds” button to enter the payment information received with the application. Click “Add”
