Departments
FROM: New York State Department of Health (NYSDOH)

HEALTH ADVISORY: PEDIATRIC MULTI-SYSTEM INFLAMMATORY SYNDROME TEMPORALLY ASSOCIATED WITH COVID-19 INTERIM CASE DEFINITION IN NEW YORK STATE

SUMMARY

- Recently a possible link has been reported between COVID-19 and Pediatric Multi-System Inflammatory Syndrome (PMIS) temporally associated with COVID-19.
- As of May 12th, 102 suspect cases of PMIS have been reported by hospitals in New York State and are under investigation by the New York State Department of Health.
- Suspect and confirmed cases of PMIS potentially associated with COVID-19 in those under 21 years of age are required to be reported to the NYSDOH.
- The New York State Department of Health has established a preliminary case definition for PMIS based upon the review of cases to date.

INTERIM CASE DEFINITION: PEDIATRIC MULTISYSTEM INFLAMMATORY SYNDROME TEMPORALLY ASSOCIATED WITH SARS-CoV-2

Clinical Criteria: An individual aged < 21 years with:
- A minimum one-day history of subjective OR objective fever (≥ 100.4° F/38° C); AND
- Hospitalization; AND
- Either:
  - One or more of the following:
    - Hypotension or shock (cardiogenic or vasogenic)
    - Features of severe cardiac illness including but not limited to myocarditis, pericarditis, or valvulitis, significantly elevated troponin/pro-BNP, or coronary artery abnormalities
    - Other severe end-organ involvement including but not limited to neurological or renal disease (excluding severe respiratory disease alone)
  - OR
  - Two or more of the following:
    - Maculopapular rash
    - Bilateral non-purulent conjunctivitis
    - Mucocutaneous inflammatory signs (mouth, hands, or feet)
    - Acute gastrointestinal symptoms (diarrhea, vomiting, or abdominal pain); AND
- The absence of a more likely diagnosis of the illness, e.g., bacterial sepsis or other viral infection.
Laboratory Criteria:

- **General Laboratory Criteria:** Two or more of the following markers of inflammation:
  - Neutrophilia, lymphopenia, thrombocytopenia, hypoalbuminemia, elevated C-reactive protein (CRP), erythrocyte sedimentation rate (ESR), fibrinogen, D-Dimer, ferritin, lactic acid dehydrogenase (LDH), interleukin 6 (IL-6), OR elevated procalcitonin

- **Virologic Laboratory Criteria:** One of the following SARS-CoV-2 laboratory results
  - Detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test (e.g., RT-PCR) (or detection of SARS-CoV-2 antigen in a clinical specimen), at the time of presentation with this clinical picture or within the prior 4 weeks.
  - Detection of SARS-CoV-2 antibody in serum, plasma, or whole blood indicative of a new or recent infection.

Epidemiologic Criteria:

One or more of the following exposures in the 6 weeks prior to the onset of symptoms:

- Close contact with an individual with laboratory-confirmed SARS-CoV-2 infection.
- Close contact with an individual with illness clinically compatible with COVID-19 disease who had close contact with an individual with laboratory-confirmed SARS-CoV-2 infection.
- Travel to or residence in an area with sustained, ongoing community transmission of SARS-CoV-2.

**CASE CLASSIFICATIONS:**

- **Confirmed:** Meets clinical, general laboratory, and virologic laboratory criteria
- **Suspect:** Meets clinical, general laboratory, and epidemiologic criteria

**REPORTING**

- Suspect and confirmed cases of pediatric multisystem inflammatory syndrome potentially associated with COVID-19 in those under 21 years of age must be reported to the NYSDOH.
- Hospitals are required to report pediatric multisystem inflammatory syndrome potentially associated with COVID-19 daily using the HERDS application on the NYSDOH health commerce system.
- In addition, clinicians are strongly encouraged to perform molecular testing for SARS-CoV-2 and serologic testing on all suspect cases.

*For questions about the HERDS survey: please send an e-mail to hospinfo@health.ny.gov.*

*Providers who have questions can contact the NYSDOH Bureau of Communicable Disease Control at 518-473-4439 during business hours or 1-866-881-2809 evenings, weekends, and holidays.*
