3 Steps to Manage
Monkeypox

Prevent

Avoid contact
with people who
may be infected.

Get vaccinated
if you are at high risk
of infection.

Detect

Watch for symptoms
(fever, rash,
exhaustion, aches,
respiratory symptoms).

Get tested
If you have a known
exposure or
develop symptoms.

Treat

Isolate
Until all sores
have healed.

Ask about treatment
Talk to a health care
provider about treatment
and managing
your symptoms.
