† The incidence of ED visits does not include patients who were admitted into a hospital.
Rate = Frequency/Population *100,000

*** In 1999 the United States began using the World Health Organization’s revised International Classification of Diseases coding book (ICD 10) for mortality data. Differences seen between data coded using the 9th revision (ICD 9) and ICD 10 may be due to coding changes and not actual differences in injury causes.
